ABOUT ME

I am a passionate Computer Science student with a strong interest in web development and programming. My primary focus is on building modern, user-friendly websites that are not only functional but also scalable. I have hands-on experience in designing and developing websites using front-end technologies such as HTML, CSS, and JavaScript, with a solid understanding of how to structure static websites for future expansion, including potential database integration. I am always eager to learn new technologies and am looking for opportunities to apply my skills and gain valuable industry experience through an internship.

PROFILE

- **Name :** Nitipon Chimsaard
- **Nickname :** Baytong
- **Age :** 20 ปี
- **Birthday :** 10 April 2004
- **Nationality :** Thai

SKILL

Language

- HTML
- CSS
- JavaScript
- PHP
- SQL

Soft Skill

- Eagerness to Learn
- Organized and Strategic Thinking
- Adaptability and Flexibility
- Strong Work Ethic

EDUCATION & CERTIFICATIONS

2021

Nawaminthrachinuthit Triamudomsuksapattanakarn School
science - math

2022-Present

RMUTP Rajamangala University of Technology Phra Nakhon (RMUTP)

Majors : Computer Science
GPA : 3.52

PROJECTS

About Me Website

Developed a personal portfolio website with a static structure, using HTML, CSS, and JavaScript. Designed for ease of use, with a responsive layout, animations, and a clear, professional presentation across all devices.

Florist's Website

Developed a flower shop e-commerce website using a static data structure, with future database integration in mind. Implemented product search, filtering, and a shopping cart system with Local Storage. Designed a responsive and user-friendly UI/UX for seamless use across all devices.

Design Slider Game

Developed an interactive web application with a slider game that lets users customize and arrange elements. Built as a static website for fast loading, with a scalable structure for future database integration. Demonstrates skills in UX design and web development, adaptable to various requirements.

PROJECTS

About Me Website

Developed a personal portfolio website designed for ease of use and professional presentation. Built with a static data structure without reliance on databases, utilizing HTML, CSS, and JavaScript. The website features a responsive design to ensure compatibility across all devices and enhances user experience through animations and a clear, structured layout.

Florist's Website

Developed an e-commerce flower shop website using a static data structure, designed to accommodate future integration with database systems. Implemented key features such as product search and filtering using JavaScript and a shopping cart system utilizing Local Storage. Designed an intuitive UI/UX to appeal to target customers and ensured full responsiveness for seamless usability across all devices.

Sneaker Store Website

Designed and developed a modern e-commerce shoe store website using HTML, CSS, JavaScript, and JSON with a static data structure. Implemented a shopping cart system utilizing Local Storage. The website's structure is designed for future scalability, such as adding database integration or user authentication systems. Ensured responsive design for seamless functionality across devices and enhanced user experience with interactive features like a carousel.

Design Slider Game

website is an interactive web application designed to deliver an engaging user experience through a slider game that allows users to customize and arrange elements as desired. Developed as a static website, it ensures fast data loading and features a scalable structure that can be extended to integrate with databases or other systems in the future. This project highlights proficiency in user experience (UX) design and web development, showcasing adaptability to diverse functional requirements.
